

Akarsh Jain

jainakarsh2805@gmail.com — +91 9399800172 — [LinkedIn](#) — [GitHub](#)

Professional Summary

Detail-oriented Computer Science undergraduate with hands-on QA internship experience in functional testing, defect lifecycle management, and API validation using Postman. Skilled in manual testing, test case design, regression testing, and STLC processes across Agile environments. Proficient in Jira, Git, and REST API testing. Eager to contribute to Techolution quality engineering team by delivering reliable software through systematic testing and clear defect documentation.

Technical Skills

Testing: Manual Testing, Test Case Design, Test Scenarios, Bug Lifecycle, Regression Testing, Sanity Testing, Black-box Testing, White-box Testing, UAT, Defect Management, Test Plan Writing, Boundary Value Analysis, Equivalence Partitioning

Tools: Jira, Postman, Git, GitHub, VS Code

Web & CMS: HTML5, CSS3, JavaScript, WordPress

Backend & APIs: REST APIs, FastAPI (basic), JSON, JWT

Languages & Database : Java, Python, MySQL, SQL

Cloud: AWS (EC2, S3), Google Cloud

Concepts: SDLC, STLC, Agile, API Testing, Scrum

Experience

Software Development Intern, Femira (by Meraji), Indore

Jan 2026 – Present

- Performed functional testing and debugging of application features across frontend and backend modules.
- Created and executed test cases based on product requirements to ensure feature correctness.
- Identified, documented, and tracked bugs with clear reproduction steps and expected vs actual results.
- Collaborated with developers to reproduce defects and validate fixes in iterative development cycles.
- Participated in Agile workflows including sprint planning, testing cycles, and daily stand-ups.

Projects

Project Synapse – AI-Powered Delivery Platform [\[GitHub\]](#) [\[Live Demo\]](#)

Aug 2025 – Oct 2025

React.js, Tailwind CSS, REST APIs, SQLModel, Leaflet.js, Postman, JWT authenticator

- Designed and executed comprehensive test scenarios for real-time order tracking, dashboard workflows, and role-based functionalities ensuring system reliability.
- Performed API testing using Postman to validate request-response cycles, status codes, and data consistency across endpoints.
- Identified, documented, and tracked UI/UX and functional defects with clear reproduction steps, and performed regression and sanity testing to ensure application stability after updates.

Sahayak AI – Intelligent Assistant System [\[GitHub\]](#)

Dec 2024 – Jan 2025

Python, NLP, REST APIs, AI Models

- Tested conversational workflows for intent recognition accuracy, contextual responses, and edge case handling across multiple scenarios.
- Validated system outputs under varied inputs to ensure consistency, correctness, and improved interaction quality.
- Analyzed system behavior and identified logical inconsistencies, enhancing reliability of AI-driven responses.

MEDIBOT – AI-Enabled Teleconsultation System [\[GitHub\]](#)

Jul 2024 – Aug 2024

React.js, Tailwind CSS, REST APIs, AI/NLP Concepts

- Performed end-to-end usability testing to validate patient interaction flows and ensure smooth navigation across modules.
- Conducted cross-browser and cross-device testing to ensure responsive design and consistent performance.
- Identified UI inconsistencies and functional gaps, contributing to improved system stability and user experience.

Education

Vellore Institute of Technology, Bhopal

Sept 2022 – July 2026

B.Tech in Computer Science and Engineering

CGPA: 7.92

Achievements & Activities

- Secured Top 20 position in GrabHack among national-level teams and actively participated in hackathons including SIH, EY, Amazon, Myntra, Adobe, and TVS, gaining hands-on experience in solving real-world problems under time constraints, rapid prototyping, and collaborative development.
- Served as Student Coordinator for TCS Campus Recruitment Process, efficiently managing candidate flow, coordinating with teams, and ensuring smooth execution of large-scale placement activities.
- Vice President of Edu4U Club, leading academic initiatives, organizing technical workshops, and driving student engagement through structured learning and event management.
- Completed Virtual Internship in Generative AI with Google Cloud (SmartBridge), gaining hands-on exposure to API-based applications, system validation, response accuracy testing, and real-world AI workflow debugging.

Certifications

- AWS Certified Cloud Practitioner
- Oracle OCI Generative AI Professional
- GenAI Powered Data Analytics – Forage
- AI Fundamentals – Accenture
